

Let it Flow

For mastering highly viscous liquids – the Eppendorf ViscoTip®

Have you ever experienced the limits of your tips and tools when handling highly viscous liquids?

The Multipette® multi-dispenser tip ViscoTip® is specialized for tough-to-handle liquids like cream. Therefore, ViscoTip naturally expands the broad range of applications for our often copied, never equaled Multipette/Combitips® advanced system. For fast, precise and safe liquid handling.

Aspirate Once, Pipette Many Times

Even challenging liquids used in daily routine that might usually need an adjustment of your instrument are handled precisely, safe and easy. Get your mind and hands free!

Easy and safe handling.

Automatic tip volume recognition, display of selected dispensing volume and a step counter make cumbersome calculations superfluous and daily routine more safe and easy.

Single aspiration + multiple pipetting steps = multi dispensing.

Save time by dispensing up to 100 times with one tip filling and highest precision in every step. The one-handed and contact-free ejection of tips with securely sealed liquids allows for safer and faster work.

Positive displacement pipetting

Unlike the air-cushion technology in regular pipettes, this liquid handling technology works like a syringe. This ensures that the correct volume is dispensed regardless of density, viscosity, volatility or temperature of the liquid. Main advantages of positive displacement systems compared to widely used air-cushion pipettes include:

- > Handling of non-aqueous liquids without cumbersome adjustment of your pipette to achieve high precision
- > Prevents aerosol contamination with sealed piston for secure dispensing
- > Provides protection from radioactive and toxic substances

Sealing Piston

Direct contact with the liquid

Cylinder

ViscoTip and Combitips advanced are ideal for handling challenging liquids. Experience the latest member of the Combitips advanced dispenser tip family.

- > Specifically designed and optimized for handling high viscosity liquids up to 14.000 mPa*s
- > Increase ergonomics, working speed and battery life time of your Multipette
- > Color coded double ring and special volume scale for distinction from other tip family members

Liquid property	ViscoTip®	Combitips® advanced
Viscosity < 200 mPa* s (< Glycerol 93 % at 20 °C)	–	✓
Viscosity 200 mPa* s - 14.000 mPa* s	✓	–
Foaming liquids (e.g. high protein content)	✓	✓
Density higher than water (e.g. sulfuric acid)	✓	✓
High vapor pressure (e.g. ethanol, acetone)	–	✓
Infectious/radioactive/toxic (e.g. Blood, Serum)	✓	✓
Detergent containing (e.g. PCR Mastermix)	✓	✓
Liquid temperature different from room temperature	✓	✓
Tip property/Instrument interaction		
Free of leachables (e.g. slip agents, plasticisers, biocides)	✓	✓
Automatic tip volume recognition (by Eppendorf dispensers only)	✓	✓
Distinctive color coding	✓	✓

ViscoTip® Multi-Dispenser Tips

Don't waste time to calculate

Automatic tip recognition and volume calculation in Multipette M4/E3(x).

Free of leachables and slip agents

The ViscoTip is free of experiment-interfering leachables (e.g. slip agents, biocides, plasticisers).

Save time to find the right tip

The color coded double ring and the continuous volume scale distinct the ViscoTip from Combitips advanced.

Make life easier for your instrument

The new design of the tip features significantly lower operation forces, thus it speeds up work and reduces energy consumption.

Viscosity Check: ViscoTip vs. Combitips advanced

Viscous liquids, especially with a dynamic viscosity of $> 200 \text{ mPa}\cdot\text{s}$, have a high resistance to flow into and within pipetting systems.

The ViscoTip is specialized on a dynamic viscosity beyond $200 \text{ mPa}\cdot\text{s}$ to up to $14,000 \text{ mPa}\cdot\text{s}$. This leads to an extended application range, increased ergonomics, increased working speed and enhanced performance of the electronic Multipette E3(x) system.

Exemplary liquids:

- > Glycerol 99.5 %
- > Tween® 20, Triton® X-100, collagen
- > Engine oil SAE 90
- > Liquid detergent
- > Paints
- > Liquid Honey, mustard, tomato sauce
- > Nail polish, ointments, shampoo
- > Molasses 83°BX

The Science of Pipetting to Perfection

Do you already know everything there is to know about pipetting? We have created a comprehensive guidebook to help you carry out good science.

Discover what you should consider before selecting a new pipette and how correct usage and careful maintenance will ensure your instrument always functions at peak performance.
